DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 20 February 2009 has been entered.

Election/Restrictions

2. This application is in condition for allowance except for the presence of claims 9-13 directed to an LCD non-elected without traverse. Accordingly, claims 9-13 have been cancelled.

Allowable Subject Matter

3. Claims 1, 4, 7-8, and 14-19 are allowed.

4. The following is an examiner's statement of reasons for allowance: Claims 1 and 8 recite an aligning method of a ferroelectric liquid crystal display comprising steps of rubbing the first alignment film of the upper plate through the first mask according to one rubbing direction (*claim 8: along a first direction*), rubbing the second alignment film of the lower plate according to the one rubbing direction (*claim 8: through the second mask along the first direction*), wherein the opening regions of the first mask on the first alignment film corresponds to blocking regions of the second mask on the second alignment film respectively, and the opening regions of the second mask on the second

alignment film corresponds to blocking regions of the first mask on the first alignment film respectively, wherein after the upper and lower plates are assembled, the first and second alignment films have opposite rubbing directions in adjacent liquid crystal cells.

5. *Tanuma et al. (US 5,917,569)* discloses an aligning method of an LCD comprising steps of rubbing the first alignment film of the upper plate through the first mask according to one rubbing direction (*claim 8*: along a first direction), rubbing the second alignment film of the lower plate according to the one rubbing direction (*claim 8*: along the first direction). However, *Tanuma* does not disclose wherein the method is for a ferroelectric LCD, a first mask on the upper plate, or wherein the opening regions of the first mask on the first alignment film corresponds to blocking regions of the second mask on the second alignment film respectively, and the opening regions of the second mask on the second alignment film corresponds to blocking regions of the first mask on the first alignment film respectively, wherein after the upper and lower plates are assembled, the first and second alignment films have opposite rubbing directions in adjacent liquid crystal cells, nor would it have been obvious to do so.

6. *Takato et al. (US 6,445,434)* discloses an aligning method of a ferroelectric LCD comprising steps of rubbing the first and second alignment films of the upper and lower plates. However, *Takato* does not disclose rubbing the first alignment layer of the upper plate through the first mask according to one rubbing direction (*claim 8*: along a first direction), rubbing the second alignment film of the lower plate according to the one rubbing direction (*claim 8*: along the first direction), wherein the opening regions of the first mask on the first alignment film corresponds to blocking regions of the second

mask on the second alignment film respectively, and the opening regions of the second mask on the second alignment film corresponds to blocking regions of the first mask on the first alignment film respectively, wherein after the upper and lower plates are assembled, the first and second alignment films have opposite rubbing directions in adjacent liquid crystal cells, nor would it have been obvious to do so.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
